Technical Skills

Languages: C++, JavaScript, TypeScript, SQL, Java, HTML, CSS.

Frameworks & Libraries: React.js, Angular, Node.js, Express.js, Redux, Chart.js, ExcelJS.

Databases: MySQL, MongoDB, Redis.

Cloud & DevOps: AWS (Lambda, S3, EC2, RDS, API Gateway, Cognito), Docker, Kubernetes, Serverless Framework, Git, Postman.

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), Operating Systems, Database Management Systems (DBMS), Computer Networks, System Design, Multithreading & Concurrency.

Experience

Software Engineer — Varuna Sentinels B.V.

Jun 2025 – Present

🌐 **VS-MPS (Marine Procurement System)**

Remote — Netherlands HQ (Varuna Marine Group)

- Optimized **MySQL** stored procedures and **RFQ/PO/Invoice APIs** via **Sequelize ORM** and **JSON** aggregation, cutting DB latency by **70%** and reducing page load from **48s → 8s**.
- Developed secure **Buyer-Supplier real-time messaging** with **WebSockets**, **JWT + HMAC-SHA256** auth, and **AWS Lambda/API Gateway**, enabling role-based validation and instant updates.
- Delivered dynamic **Buyer/Supplier dashboards** with automated RFQ-Invoice flows, **Chart.js analytics**, and live sync APIs — achieving **80% faster loads** and higher operational visibility.

Education

Motilal Nehru National Institute of Technology Allahabad

Jun 2025

Bachelor of Technology in Electrical Engineering (CGPA: 7.6 / 10.00)

Allahabad, Uttar Pradesh

Achievements

- Hackathon Winner - CircuitBuzz (Avishkar):** Secured 1st place in an electrical engineering hackathon by excelling in a domain-specific coding and circuit design assessment, demonstrating logical reasoning, algorithmic expertise, and technical proficiency.
- Secured a Global Rank of 700 in Leetcode Biweekly Contest 139** after competing against thousands; earned the **Leetcode Knight Badge**, showcasing strong proficiency in data structures and algorithms-[Leetcode Profile Link](#) 🔗.
- Specialist on Codeforces with a rating of 1432**, demonstrating competitive programming excellence-[Codeforces Profile Link](#) 🔗.

Projects

🌐 **Subscription Tracker API** | [GitHub](#) | *Node.js, Express.js, MongoDB, JWT, Arcjet, Upstash* Feb 2025 - March 2025

- Secured the API with **Arcjet**, reducing bot traffic by 40% through advanced **rate limiting** and protection.
- Built a subscription management system with **JWT authentication** and role-based access, improving security by 50%.
- Engineered a global **error-handling and logging system**, reducing debugging time by 35%.
- Automated email reminders using **Upstash**, increasing user retention by 25% through scheduled notifications.

🌐 **Shortify** | [GitHub](#) | *Node.js, Express.js, MongoDB, JWT, EJS, Bootstrap*

Jul 2024 - Aug 2024

- Developed a robust **URL shortening service**, reducing link lengths by 80% and enabling seamless sharing, boosting usability for end-users.
- Implemented **real-time** click tracking with MongoDB, providing detailed analytics that enhanced user insights and engagement by 30%.
- Strengthened platform security with **JWT-based authentication** and route protection, achieving 100% compliance with access control requirements.
